## CASE STUDY

**NATURE OF JOB:** Outdoor Broadcasting from a horse racing event in Ireland

**REASON FOR CHOOSING THIS MACHINE:** Camera bracket available for platform, skilled operator

**CHALLENGE:** A broadcasting company needed the machine and expert operator to arrive onsite early allowing time for rigging the tv camera on to the purpose built camera bracket, while securing the feeder cables along the boom in time for the first race on a Bank Holiday weekend.

**EQUIPMENT:** Bronto Skylift S 34 MDT.

## SOLUTION

Our expert operator arrived on site early with the 34m Bronto and worked closely with the TV crew as part of their team helping to mount the camera on to the purpose built camera bracket fitted to the cage. He ensured the camera was attached securely and that the camera operator could maneuver safely into the ideal position to cover the start and finish lines for all the races on the day's card. They also had to secure the output cables to the boom.

With several thousand people attending the event, safe operation of the 34m Bronto was a priority.
